Response After Final Rejection

Dear Sirs,

The applicant is in receipt of the Advisory Action mailed on 20 December 2011. Immediate reconsideration is demanded. It is requested that a supervisory examiner review this matter.

The examiner is under the mistaken belief that it is only necessary to demonstrate that claim integers merely exist in three fairly distinct and unrelated references. It is entirely inadequate for the examiner to simply indicate where isolated features can be found in the prior art. It is the examiner's case to demonstrate why the invention would have been obvious to someone of ordinary skill. Persons of ordinary skill would not seek to combine features from some such diverse and technically unrelated references in the way first
